

Climate Action

To combat global warming, we need to reduce carbon emissions worldwide. In this way, we can limit climate change and minimise the negative impact on people and nature.

Climate change mitigation measures

CO₂-reduction

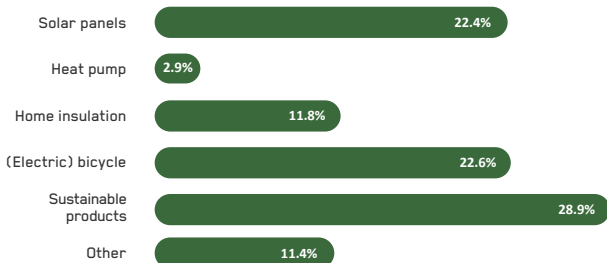

Our goal is to be climate neutral in:

2030 for our business operations.

2040 for our corporate investments.

2050 for our insurance portfolios and services.

72% of employees used the €2,500 climate budget. This was spent on solar panels, heat pumps and home insulation, among other things.

Over **€2 billion** invested in green bonds and sustainable infrastructure.

We conduct dialogue with **34 investee companies** on their climate plans. We also exclude **385 fossil companies** from investments.

100% of all new leased cars are electric.

100% of our energy we buy green.

We planted over **1 million** trees through Landlife Company.
