

Sustainable cities and communities

Making cities safer, more inclusive and sustainable. This includes affordable housing, good public transport and social cohesion. Cities and their residents also need to be better prepared for the impacts of climate change such as heat stress, floods and extreme weather events.

Affordable housing

91% of our newly acquired investment properties have an affordable rent (600 homes).

188 people with important professions such as teachers, nurses and police officers, helped to find housing in The Hague, Utrecht, Rotterdam and Amsterdam.

Inclusive and sustainable urbanisation

5,322 customers purchased a sustainable service such as home insulation, a heat pump or solar panels.

47% of our newly-acquired investment properties are suitable for older people with care needs

500 Homes in our real estate portfolio made more sustainable

75 Million Euro invested in sustainable healthcare real estate

700 million Euro lent to housing associations for social housing.
